Buenos Aires, Argentina

Short Introduction

Full Stack Developer & AI Engineer with a background in Information Systems, specializing in agentic workflows, LLM integration and process automation. Seeking new opportunities to build and scale AI-driven solutions

Key Qualities

- Problem-solving & analytical thinking
- Attention to detail & ownership
- Fast learner & adaptable to emerging technologies
- Collaborative mindset in agile teams

Languages

- Spanish (Native Language)
- Italian (Native Language)
- English (B2 Level – LSI Berkeley, San Francisco, USA)

Professional Skills

- AI & Agentic Development: AI Agents, LLM integration, MCP, workflow automation.
- Version Control & DevOps: Git, Docker, Bash scripting, CI/CD pipelines.
- Programming Languages: Java, JavaScript, Node.js, React.js, Python, C, C++, Kotlin.
- Databases: SQL (MySQL, PostgreSQL) and NoSQL (MongoDB).
- Software Architectures: UML, microservices, REST APIs.
- Agile Methodologies: Scrum and Kanban.

Work Experience

2025 – Att **Full Stack Developer** – Rappi

Implementation of web apps with **AI Agents** for internal documentation and technical support automation, ensuring high performance. **Backend/frontend** development, optimizing CI/CD of AWS microservices.

2021 – 2024 **Data Architect** – DBlandIT

Designed and **managed data architecture**. Performed analysis, cleaning and log monitoring, along with script creation to optimize information flow.

2020 – 2021 **Research Fellow** – National Technological University (UTN FRBA)

Collaborated with the UDB Chemistry teaching team to **develop a platform** for administering exams and storing responses during the pandemic, based on Google Suite.

Projects & Contributions

2026 **Development** of an **MCP server-client** architecture in Python designed to centralize and dynamically retrieve microservices documentation.

2025 **HR Workflow Automation** developed for the Human Resources sector, migrating a legacy workflow into a seamless and fully integrated ecosystem using **n8n**.

2024 **Developed an Android App** in **Kotlin** and **Jetpack Compose** to facilitate the search, details, and creation of cocktails.

2023 **Presentation of the paper "OfferHub"**: the platform that facilitates users' search for promotions" at the **CONAISI** National Congress.

Courses and Certifications

2026 **LLMs, Workflows & MCP** – Implementation of Model Context Protocol for AI agent integration and Skills – Anthropic's course.

2025 **Prompt Engineering for Developers** – Use AI agents to empower your work – Udemy course

2024 **Python** Scientific computing with python – FreeCodeCamp.org

2023 **JavaScript** Algorithms and Data Structures – FreeCodeCamp.org

2022 **MongoDB** Basics, Basic Cluster Administration, Diagnostic Thinking – MongoDB University

Education

2019 – 2024 Information Systems Engineer – UTN FRBA

2014 – 2018 High School Diploma in Computer Science – Colegio F.A.S.T.A
